CNN vs Fox News Sentiment

CNN vs The Washington Post Sentiment

Saudi Arabia News Coverage

Polarity: The orientation of the statement whether negative, neutral or positive. It ranges from (-1,1). (-1) indicates negativity and (1) indicate more positivity.

Subjectivity: Measures if statement is based on a fact or influenced by personal feelings and opinions. Is there a judgment, opinion or emotion in the statement? It ranges from (0,1). (0) being a fact and (1) a personal feeling.

The **dots** are averaged approximately over every 70 news texts over time. It shows how subjectivity and polarity are related to each of the news agency texts. You can see that when the subjectivity of the tweets are large the polarity varies a lot. On the other hand for news with small subjectivity, polarity does not vary much.
